## AVX Enhances and Expands MIL-PRF-123 Product Series

AVX Corporation has enhanced and expanded its MIL-PRF-123 product offering. Available in molded radial, molded axial and two-pin dip lead configurations, the expansion includes improved capacitance values, higher voltages and new tolerances. Capacitance values range from .1pf in axial leads and up to .47uf in radial leads and voltages range from 50 to 200V in radial and axial lead configurations.

AVX is once again setting the standard in the electronic component industry with additions to our industry leading MIL-PRF-123 offering.

**AVX is the first in the industry to expand its MIL-PRF-123 portfolio with several hundred new ratings.** This product enhancement exemplifies AVX's continued support of thru-hole technology to the military and aerospace market.

AVX's MIL-PRF-123 Series enhancement includes:

- CKS05 and CKS06 molded radial products
- CKS11, CKS12, CKS14, CKS15 and CKS16 molded axial products.
